

Eppinger Manufacturing's award winning line of spoons is even more effective now with the latest additions to our vast line of colors and patterns including Hammered and Glow colors!

Over the last several years our field testers have been developing the next generation of colors and patterns for our world famous Dardevle and Red Eye spoons. These colors have proven to produce aggressive strikes from prized game fish such as Pike, Bass, Salmon, and Trout and they are all 100% American made quality at its best.
